ABSTRACT

Information on U.S. and Canadian theological schools is provided, including enrollments, professional staff, and salaries for 1984-1985, and graduation, finance, and library statistics for 1983-1984. Per student revenue and per student/per faculty expenditures are based on fall 1983 headcount and full-time equivalency enrollment and employment. Enrollment comparisons for 197 institutions for 1983-1984 and for 187 institutions for 1979-1984 are provided. Additional information includes: changes in number and percentage of total professional enrollment within various categories of programs; sex distribution of preordination degree students; women ordination degree graduates by denomination; enrollment for minority groups (Blacks, Hispanic Americans, Pacific/Asian Americans, and Native Americans); changes in numbers of administrators, faculty, and library personnel contrasted with numbers of students; sex distribution of administrators and faculty; changes in employment of Blacks by position held; trends in salaries for staff; changes in financial data per full-time student; analysis of revenues and expenditures by size, status, and racial character of school; revenues by denominational affiliation of school; revenues by regions; and revenues by highest degree offered. THE ASSOCIATION OF THEOLOGICAL SCHOOLS
IN THE UNITED STATES AND CANADA

The Association of Theological Schools in the United States and Canada is the established accrediting agency for graduate theological education. Tracing its origins to 1918 when formal consultations on theological education were begun, the Association now numbers almost 200 institutions reflecting the diversity of the religious communities and university relationships in the two national communities. Its purposes include, within a general mandate for the improvement of theological education, the establishment of standards and the accreditation of institutions, serving as a forum for shared interests, and the consideration of issues among members and between members and related agencies. In the exercise of its standard setting duties, the Association has maintained a membership list of accredited schools since 1936. The Association also publishes annually a Directory of Theological Schools.

The officers of the Association for the 1984-86 biennium are:

President: Principal C. Douglas Jay, Emmanuel College of
Victoria University, Toronto, Ontario, Canada

Vice-President: Dean Barbara Brown Zikmund, Pacific School
of Religion, Berkeley, California

Secretary: President William R. Myers, Northern Baptist
Theological Seminary, Lombard, Illinois

Treasurer: Mr. Kenneth R. Hougland, Louisville Presbyterian
Theological Seminary, Louisville, Kentucky

The Association's professional staff includes:

Executive Director: Leon Pacala

Associate Director: David S. Schuller

Associate Director: William L. Baumgaertner

Director of Financial and Data Services: Jill Scott Norton

INDEX OF TABLES

<u>Table</u>	<u>Title</u>	<u>Page</u>
1	Total Enrollment Trends, 1969-1984	1
2	1983 and 1984 Comparisons: The Same 197 Institutions Reporting	2
3	Comparable Enrollments, 1979-1984: The Same 187 Institutions Reporting	2
4	Comparisons of Total Enrollment, 1978-1984 Total Number of Individuals and Their Full-Time Equivalents	2
5	Changes in Number and Percentage of Total Professional Enrollment Within Various Categories of Programs	4
6	Distribution of D.Min. Enrollments	5
7	Changes in Graduate Enrollments and Percentage of Change	7
8	Distribution by Sex and Degree Level: All Students	8
9	Sex Distribution of Preordination Degree Students (M.Div. and D.Min. In-Sequence)	9
10	Total Women Graduates from Post-M.Div. Academic Programs	10
11	Women Professional Degree Graduates	11
12	Women Ordination Degree Graduates by Denomination	12
13	Changes in Black Student Enrollment	13
14	Sex Distribution of Black Students	15
15	Total Black Graduates from Post-M.Div. Academic Programs	16
16	Sex Distribution of Hispanic/American Students	17
17	Sex Distribution of Pacific/Asian American Students	19
18	Native American Enrollment	21
19	Changes in Numbers of Graduates: Professional Degrees	21
20	Changes in Numbers of Graduates: Doctoral Degrees	23
21	Changes in School Size and Comparative Enrollments	24

<u>Table</u>	<u>Title</u>	<u>Page</u>
22	Changes in Numbers of Full-Time Administrative, Faculty, and Library Personnel Contrasted with Numbers of Students	25

INTRODUCTION

This is the sixteenth annual edition of the Fact Look. Each year all of the Association's member schools are required to provide annual reports on forms which are supplied. These reports include information on enrollment, professional staff, and salaries for the current year, 1984-85. They also include graduation statistics, financial reports, and library data from the previous academic year, 1983-84. Per student revenue and per student/per faculty expenditures are based on the fall 1983 "head count" and "full-time equivalency" enrollment and employment, as well as on the audited financial information for the 1983-84 year. These enrollment totals are reported for individual schools of theology in Tables A, B-1, and B-2.

This is the fourth successive year in which the per student and per faculty revenue/expenditure tables (AA-1 through JJ-2) are supplied on both a "head count" and "full-time equivalency" basis. Tables C-6, D-6, and E-6 in the appendices provide these latter data, with Table B-2 reporting both the "head count" and "FTE enrollments" for individual schools. Tables AA-1 through JJ-1 provide revenue/expenditure data on the "head count" basis, while Tables AA-2 through JJ-2 are parallel, using the "full-time equivalency" information. The differences between the two become increasingly important as schools continue to experience an influx of more part-time students in their various degree programs. This is the first year in which Gifts and Grants Income are reported in Tables WW-1 through 8.

From the beginning of publication a primary purpose of these Fact Books has been to provide annually information on parallel patterns permitting ready comparisons across the years. Where changes have been introduced these have generally been in the form of providing additional information not previously supplied or to acknowledge changes that have occurred. All data, with the exception of the Native American enrollments, are subjected to computer analysis. Since these latter numbers continue to be quite small, they have been fully summarized in the text, but are not found in the computer generated appendices.

The data received from each school are classified in several ways: size of enrollment, accredited or "other" (i.e., candidate and associate member institutions), university relation, cluster membership, race, denomination, region of location, and highest degree offered for the accredited schools only. These classifications provide the basis for the

distributions found in the tables included in the appendices. Table A indicates the classification identifiers for each member school, including both the 1983 and 1984 fall enrollments. Table B-1 reports the changing enrollment patterns for each member school on a quadrennial basis beginning in 1956 or the year of initial Association membership, if later than 1956. Table B-2, included for the fourth successive year, reports individual school enrollment by separate degree programs for both 1983 and 1984, "head count" and "full-time equivalent."

Certain arbitrary decisions are necessary with regard to these classifications. For example, a seminary is classified as a part of a university only if the larger institution possesses two other professional schools or departments operating at the graduate level. Schools are classified as related to a cluster only if the relationship includes at least two other schools of theology. Denominational groups are sorted and reported publicly--in these Fact Books--only if the denomination maintains at least four institutions which are members of the Association. Because the computer cannot deal with dual denominational status--which some schools hold, each has been classified on the basis of the primary church membership of the student body. Thus, Andover Newton is included in the United Church of Christ category, rather than American Baptist. Neither Bexley Hall nor the Berkeley Divinity School, both Episcopal seminaries, are included in the Episcopal data because of their relationships with Colgate Rochester and the Yale Divinity School respectively. The Lutheran category is not one denomination, but it combines the data for the American Lutheran Church, Association of Evangelical Lutheran Churches, and Lutheran Church in America schools into a single inclusive category. Prior to the 1982-83 edition the term "Lutheran" applied only to the Lutheran Church in America schools. There are ten institutions included in this new composite Lutheran category. This is the second year the new denomination, the Presbyterian Church, U.S.A., appears. The data for prior years have combined the information for the Presbyterian Church in the United States and the United Presbyterian Church. Note also that, at the request of the school, the data for the Pacific School of Religion were shifted in 1983-84 for the first time to the United Church of Christ category, rather than the inter-/nondenominational grouping, as in the past. Tables in the text were adjusted to reflect this change. However, readers using previous Fact Books must do so with care, since these two subgroupings are no longer precisely parallel in successive volumes.

Since 1980 the Association has had three separate categories of institutional membership: accredited member, candidate for accredited member, and associate member. For the purposes of the Fact Book, the latter two groupings (candidates and associates) have been combined in the "Other" column in the tables presenting size/status data.

As in the past, all salary scales reported in the volume have been edited to preserve confidentiality. Hence any salary data field with less than three salaries being reported indicates the number of persons but does not provide any salary information.

Finally, as editor I have written the text to report and emphasize those data which appear to me to be most important. The goal has been factual presentation and description. No value judgments about size, mode of financing, patterns of expenditure, composition of student body, or other matters are intended. Each reader is invited to make his/her own judgments on the data and their import in reference to his/her own perspectives and commitments in the theological education world. This year I have added an additional caption, e.g., [TABLE 4], to indicate clearly the textual commentary on tables 1-39.

I wish to acknowledge my personal indebtedness to Marvin Taylor, editor of the previous editions of the Fact Book. He initiated and designed the enterprise, one which we are proud to continue as we wish him well on his retirement.

The Fact Book has been prepared by the ATS staff and is offered to the ATS member schools, as well as the general public, with the hope that it will be useful to those with responsibility for the management of the theological education enterprise in North America. The work has been done with the strong conviction that management decisions are best made when the persons charged with making them have the widest range of and most complete data available to inform their deliberations.

William L. Baumgaertner

ENROLLMENT

[TABLE 1]

Theological school enrollments continued to grow during the 1984-85 academic year, as was the situation in previous years. The rate of growth has, however, slowed down during the past year, coming closer to the slow growth in the 1 or 2 percent bracket of the national average. For theological schools that was 2.5%, reversing the trend of the past two years.

TABLE 1
TOTAL ENROLLMENT TRENDS, 1969-1984

Year	Number Schools Reporting	Professional Programs	Graduate Programs	Total	% Change
1969	170	25,950	3,865	29,815	-
1970	179	26,322	4,750	31,072	+4.2%
1971	187	28,208	4,608	32,816	+5.6%
1972	189	29,034	4,002	33,036	+0.7%
1973	190	30,315	3,767	34,082	+3.2%
1974	191	33,189	3,641	36,830	+8.1%
1975	192	37,179	3,716	40,895	+11.0%
1976	193	39,291	3,732	43,023	+5.2%
1977	191	41,665	3,557	45,222	+5.1%
1978	193	42,809	3,651	46,460	+2.7%
1979	193	44,374	4,059	48,433	+4.2%
1980	194	45,571	4,040	49,611	+2.4%
1981	193	46,930	3,629	50,559	+1.9%
1982	196	48,742	3,878	52,620	+4.1%
1983	195	50,971	4,141	55,112	+4.7%
1984	197	52,179	4,287	56,466	+2.5%

Table 1 provides these enrollment data for each year since 1969, the initial publication year for these Fact Books. In that fifteen year span, seminary enrollments have risen from 29,815 persons in 1969 to 56,466 this year, up +89.3%. Some of this growth can be explained by the first column, the increase in the number of Association member schools reporting each fall. The institutional growth rate, however, has been only 15.9%, far below the student enrollment growth of 89.3%. Readers interested in details of this change in membership should consult the 1980-81 Fact Book. Table 1 also indicates that the growth has been chiefly in professional degree programs, i.e., those preparing persons for some leadership role in the churches. The graduate programs, confined chiefly to masters and doctoral degrees primarily for higher education and secondary school teaching, have fluctuated up and down during the years. In 1982 they enrolled about the same number as 1969 (3,865 in 1969 and 3,878 in 1982). In 1984 this rose to 4,287, but it is still well below the number and, more important, the proportion of graduate students in the early 1970s. Thus, enrollment growth has been church occupation related, rather than academic career oriented.

Only the following denominational groupings reported a decrease in enrollment from 1983 to 1984: Lutherans 4%; Presbyterian U.S.A. 2%; Protestant Episcopal 1.8%; U.S. Roman Catholics 2.2%.

TABLE 2
1983 and 1984 COMPARISONS:
THE SAME 197 INSTITUTIONS REPORTING

YEAR	TOTAL ENROLLMENT	% CHANGE
1983	55,112	
1984	55,708	+ 1.07%

[TABLE 2]

Table 2 provides more precise data on enrollment, since the number of institutions reporting in the last two years was not the same. This table reflects data from schools reporting in both years, and the growth was +1.07%, down substantially from the Table 1 figure of 2.5%. One member school closed during the year, but its student body merged with another member school. Three new schools became members of the Association.

TABLE 3
COMPARABLE ENROLLMENTS 1979-1984
THE SAME 187 INSTITUTIONS REPORTING

YEAR	NUMBER OF STUDENTS	% CHANGE
1979	48,433	
1984	54,293	+12.1%

[TABLE 3]

Table 3 continues these comparisons, this time on a five-year basis. During both 1979 and 1984 there were 187 schools reporting both years, and their total enrollments for the two different years are reflected in the table. They constitute a +12.1% growth, or c. 2.2% per year. In that same time period higher education has been growing at an average rate of between one and two percent. The first of three tables indicate real growth in theological school enrollment, greater than the national average. The rate of growth, however, has been declining, especially during the past year.

TABLE 4
COMPARISONS OF TOTAL ENROLLMENT, 1978-1984
TOTAL NUMBER OF INDIVIDUALS AND THEIR FULL-TIME EQUIVALENTS

Year	Total Persons	% Change	FTE Enrollment	% Change	FTE % of Total Person Enrollment
1978	46,460		36,219		78.0%
1979	48,433	+4.2%	36,795	+1.6%	76.0%
1980	49,611	+2.4%	37,245	+1.2%	75.1%
1981	50,559	+1.9%	37,254	+0.02%	73.7%
1982	52,620	+4.1%	37,705	+1.2%	71.7%
1983	55,112	+4.7%	38,923	+3.2%	70.6%
1984	56,466	+2.5%	39,414	+1.3%	69.8%

[TABLE 4]

Table 4 provides a different view of these data. The preceding tables have tabulated persons registered, regardless of the extent of their time commitment to study. Table 4 reports on persons studying full time, or in the instance of part-time students, their full-time equivalency. Here the growth rate has not been nearly so great. These data are not available for the full span of years included in Table 1, since they have been received only since 1978. In this six-year period, however, the average student study load has diminished from 78.0% of a full load of studies to 69.8%, a reduction of almost ten percent in such a brief time. These figures indicate that while the number of persons coming to seminaries for education continues to grow, a higher percentage are part-time students.

Deans and registrars indicate a trend toward older persons, often making a career change, and frequently with families to support. Several studies are being conducted this year both on denominational lines and on a cross denominational basis to document this shift in age and to study the response of schools to accommodate the special needs of older students. This increasing presence is one aspect of the growth of part-time students, a phenomenon well-known in the rest of higher education over the past 25 years. Its impact on theological schools is more recent.

The part-time rate of study, however, is not uniform across the several types of program offered. The Master of Divinity, the standard degree preparing one for ordination, enrolls by far the largest number of persons, and they register for an average load of 85.1%, well above the overall average load of 69.8%. There has been regular decline in this average since 1978 when it stood at 90.5% for the M.Div. The last two years, however, have been the same at 85.1%. Of some significance is the 11.5% increase since 1983 of persons enrolled in 4-5 year Masters of Divinity programs. The full-time equivalent increase for the same program since 1983 is 8.2%. There is an indication of a longer time spent in preparation for ministry and of the growth of programs which will demand more time.

Regional enrollment patterns also show some variations. The Plains region has the highest FTE ratio (74.9%); the Far West has the lowest (57.0%). The Great Lakes (73.5%), the Southeast (74.4%), New England (71.3%), and Canada (71.1%) are all above the average. The Far West (57.0%), the Midwest (67.4%), and the Southwest/Rocky Mountain (68.8%) are below it.

The significant changes in regional enrollment were a decrease of -5.8% (FTE -7.7%) for the Plains Region, and an increase of +4.0% (FTE +4.6%) for the Southeast Region.

Denominational comparisons are also interesting. The Episcopal schools are most likely to have full-time students (83.1%), and the United Church of Canada least likely (56.4%). Lutheran (80.1%) and U.S. Roman Catholic schools (80.0%) are a close second. In both instances these schools do not have large numbers of D.Min. students enrolled, the one degree program which is almost always carried out on a part-time basis.

[TABLE 5]

Professional Degree Enrollments

Table 5 records the major degree enrollments for selected years since 1969. Numerical growth during the past year reflects principally the addition of three new schools to Association membership. In terms of overall growth, the Doctor of Ministry program has done best from 201 persons

in 1969 to 6,721 this year. It continues to command close to 13% of total seminary professional program enrollment. The M.Div. population has grown only 40% in 15 years by comparison with a total enrollment increase of 89.3%. The M.Div. commands a smaller percentage each year, presently 55.3%. The two-year graduate programs and the special certificate programs are increasingly prominent as these percentages have advanced to 17.5% and 13.4% respectively. It is clear that seminaries are attracting students with a wider variety of interests. The D.. n. group is largely full-time professionals already holding the M.Div. and seeking advanced competence for the performance of their duties. The program holds a secure place among the professional degrees.

TABLE 6
DISTRIBUTION OF D.MIN. ENROLLMENTS

Year	D.Min. In-Sequence		D.Min. In-Ministry		Total D.Min.	
	Schools Reporting	Total Persons	Schools Reporting	Total Persons	Schools*	Persons

1984	10	254	88	6,467	89	6,721

*Note: Some institutions offer both types of program.

[TABLE 6]

Further detail on D.Min. enrollments is reported in Table 6. There are two different degrees patterns, both carrying the D.Min. designation. The "in-sequence" model is a four-year program which includes the accomplishments of the more customary three-year M.Div. and adds another full year of preordination preparation. It was this pattern which first emerged in the 60s and was responsible for creating an interest in new approaches. The "in-ministry" track adds one additional year (usually done part-time and spread across two or three years) of advanced preparation, almost always requiring a period of full-time ministerial experience following the award of the M.Div. Through the years there has been a steady decline of interest in the in-sequence degree, both on the part of students and institutions. Table 6 indicates its extent. Enrollment dropped from 499 persons (25 schools offering the pattern) in 1975 down to 254 students in ten schools this autumn. At the same time the in-ministry degree pattern almost doubled in registrants, up from 3,211 to 6,467, and about fifty percent more institutions began to offer it. These data surely indicate that there is positive clergy response to a program which purports to provide "advanced competence in the practice of ministry."

There are some interesting enrollment contrasts in the D.Min. While women as a group constitute 25% of the total students, 30% of in-sequence D.Min. registrants are women. It is only in this program and the two-year masters degrees that women are so well represented (43.2%). By way of comparison women make up only 6.6% of the D.Min. in-ministry students, well below these ratios. While somewhat striking in contrast, this is probably to be expected. The entrance of significant numbers of women into ministry is a rather new phenomenon. Hence only a very small pool of applicants possess both the M.Div. and the years of full-time professional ministry experience which are usually prerequisite for admission. Given the substantial numbers of women now entering ministry, this situation will be changing.

The D.Min. program presents other somewhat startling contrasts. While eighty-eight institutions offer the in-ministry model, most of them have quite modest enrollments in the program. In fact, these in-ministry D.Min. students are very unevenly distributed across the Association's membership. About one-third are found in only four schools of theology, leaving the remaining two-thirds distributed across 84 schools. Full details regarding these statistics can be found in the appendices, especially tables B-2, C-1, and D-1.

[TABLE 7]

Graduate Student Enrollments

Table 7 provides the details in summary form for selected years since 1969. The Association classifies as "graduate" those degree programs which require four or five years beyond the baccalaureate, or which require the M.Div. plus one to three additional years of study. The most obvious impression from the table is one of random fluctuation, up and down. This year the total graduate enrollment is the second highest on record, reflecting an 18.1% increase in those years. It seems clear that no simple pattern can be found to explain the phenomenon. In the early years of the 1970s the emergence of the D.Min. was thought to provide an alternative, thus leading to diminished graduate enrollments. However, as noted earlier, the D.Min. is flourishing. But the graduate master and doctoral programs continue to be attractive to over 4,000 persons each year. In 1982 it was 3,878; followed by 4,141 in 1983; and 4,287 in 1984.

Doctoral enrollments are especially noteworthy. In the light of the well-known retrenchment in higher education, and the scarcity of new positions, one might expect a diminished interest in such a degree. Yet the Ph.D. enrolls 147% more candidates in 1984 than was the case in 1969. The Th.D./S.T.D. programs experienced a growth of 15.2% in the past year. In fact, the fluctuations noted above hardly are found in the Ph.D. doctoral program. Its enrollment has been on a steadily upward trend all through the years that the Association has collected and published these data. That fact has been offset by the post-M.Div. masters degrees, which attract 33.2% fewer students in 1984 as contrasted with 1969. These details may also be examined in the appendices, Table C-1.

to those found in earlier editions of the Fact Book permitting precise comparisons. Data on graduation can be found in Tables F-3, G-3, and H.3.

The rapid growth in the enrollment of women is demonstrated by examining the totals at the bottom of Table 8. Twelve years ago there were but 3,358 women, constituting 10.2% of the total. This year the number of women rose to 14,142, or 25% of enrollees, one of four. While the three- and four-year degrees which customarily lead to ordination still lag behind (17.8%) the overall average, even that program has demonstrated rapid change. In 1972 women were only 4.7% of its registrants. In twelve years this has more than tripled. The increase in academic doctoral students has quadrupled in that same period. Only the graduate masters has tended to diminish.

TABLE 9
SEX DISTRIBUTION OF PREORDINATION
DEGREE STUDENTS
(M.Div. and D.Min. In-Sequence)

	Women		Men		Total Number
	Number	%	Number	%	
1976	2,905	11.5%	22,256	88.5%	25,161
1977	3,437	12.9%	23,266	87.1%	26,703

1983	5,622	19.5%	23,202	80.5%	28,824
1984	5,733	19.7%	23,401	80.3%	29,134

[TABLE 9]

Table 9 adds more precision to the observations above about the enrollment of women in ordination programs. Here the M.Div. and the in-sequence D.Min. have been segregated for comparison. Between 1976 and 1981 there was almost no increase in men enrollees for these two degree programs. In a five-year period when total seminary enrollments rose +17.5%, the registration of men in these programs increased only +0.8%. However, the enrollment of women in that period increased +67.7%. By 1984 this growth had risen further to become +97.3%! Growing enrollment in 1984 continues to reverse the decline in absolute numbers in male enrollment of 1978-81. In 1982 the number rose, after five years of slight decline, and it rose again in 1984. Nonetheless the 23,401 men enrolled in 1984 were only a few more than was the situation in 1977. And during that period seminary enrollments rose by over 13,000 persons, with none of this growth bringing additional numbers of men to the ordination programs. In summary, in 1976 women were only 11.5% of the students in ordination programs. By 1984 they had become 19.7% of the total. During that time the numbers of male registrants has virtually stood still.

TABLE 10
TOTAL WOMEN GRADUATES FROM POST-M.DIV.
ACADEMIC PROGRAMS

Year	Masters Degrees		Doctoral Degrees	
	Number	% All Graduates	Number	% All Graduates
1972-73	58	7.7%	17	5.4%
1973-74	56	8.5%	18	5.4%
1974-75	59	8.8%	21	6.6%
1975-76	101	16.8%	32	10.4%
1976-77	77	13.8%	22	8.9%
1977-78	108	20.9%	36	12.0%
1978-79	119	19.9%	30	10.3%
1979-80	134	22.2%	31	13.5%
1980-81	135	23.4%	45	14.6%
1981-82	145	23.5%	82	20.8%
1982-83	114	18.6%	63	20.5%
1983-84	90	16.5%	57	20.1%

[TABLE 10]

Table 10 provides data on the results of this increased enrollment of women in the graduate, post-M.Div. programs. It is immediately apparent that 1983-84 reflects another decline from the high of 1981-82. In that year, 1981-82, the largest numbers of women ever reported received both graduate masters and academic doctoral degrees, comprising 23.5% of the former and 20.8% of the latter. This pace was not repeated in the following year. But one must examine both the numbers of women being graduated and the percentage of the total as well. In the instance of the masters degrees, there was a drop in both numbers and percentage, representing a real reduction in ratio. Such was not the case in the doctoral degrees awarded. While 30% fewer women received doctorates than in 1981-82, this was a reduction in percentage of only 0.7%. That is, there was a substantial overall reduction in numbers of persons receiving doctorates (male and female) during 1983-84. And this affected women on almost precisely the same statistical basis as men. It is clear that the number of women available for teaching positions is increasing year by year, but the rate of increase implied by the 1981-82 data was not sustained in 1983-84. However, as Table 10 indicates, the trend across the years is still upward. Not only are larger numbers of women beginning these programs, they are also completing them and receiving the appropriate degrees.

[TABLE 11]

Table 11 provides parallel information about women receiving the professional degrees. The field of church education has been one area of full time service open to women for many years. Hence the reader should not be surprised to find that 36.8% of the Master of Religious Education graduates last year were women. As more and more women enter ordained ministry, one might expect that percentage to drop gradually. Table 11 does indicate a decrease for the second year in a row.

TABLE 11

WOMEN PROFESSIONAL DEGREE GRADUATES

Year	M.R.E.		M.Div.		D.Min. In-Sequence	
	Number	% Total	Number	% Total	Number	% Total
1976-77	312	32.8%	462	8.4%	12	9.1%

1978-79	305	38.2%	858	13.2%	13	16.9%
1979-80	338	38.7%	1,001	14.6%	18	25.4%
1980-81	324	38.7%	1,018	15.0%	27	30.0%
1981-82	383	43.8%	1,170	16.9%	30	28.6%
1982-83	360	41.4%	1,189	17.8%	16	26.7%
1983-84	320	36.8%	1,238	19.0%	16	34.7%

The women graduates in the Master of Divinity program present a far more striking contrast. As noted above, total M.Div. enrollments have been moving upward at a very modest pace, when compared to other degree programs. But the role of women in the M.Div. has been rising at a rapid rate, and this is reflected in the numbers of graduates. In just seven years (since 1976-77) women M.Div. recipients have increased 168% (from 462 to 1,238). In that same period of time men M.Div. graduates rose by only 2.3% (from 5,158 to 5,277). This sharp contrast is highlighted even more when the data in Tables 11 and 19 are compared. During 1983-84, overall M.Div. recipients actually decreased by 171 persons, but the numbers of women increased by 49 (from 1,189 to 1,238). Or, to state this even more clearly, while the number of women receiving the M.Div. rose by 49, male graduates decreased by 220.

The situation with respect to the in-sequence D.Min. presents an interesting contrast. As Table 11 reveals, here the numbers of women graduates have fluctuated across the years. But that has also been the characteristic of total numbers of graduates. Note for example, the data for the last three years: 30 women graduates constituted 28.6% of the D.Min. class in 1981-82. In 1982-83 this dropped to 16 women, but they were still 26.7% of the total. There was a total of only 60 D.Min. in-sequence graduates in 1982-83, in comparison with 105 the preceding year. This year there were 16 women graduates, constituting 34.7% of a total of 46 graduates. The steadily diminishing enrollments in this track of the D.Min. program are now being fully reflected in graduation statistics. Thus, even though the program seems to be gradually disappearing, the role of women in it remains strong, even though the actual numbers are not growing.

[TABLE 12]

Table 12 pushes these data one additional step by examining them within denominational categories. Ordination graduates here are defined as persons receiving either the M.Div. or the D.Min. in-sequence. While there

*1982-83 data for Un. Church of Christ includes one additional institution.

is some up/down fluctuation from year to year, it is apparent from the table that both the numbers and percentages of the total represented by women have increased since 1976-77. In the United Church of Christ women are one-half of the candidates ready for ordination consideration. For the United Church of Canada this ratio is 49%; for Episcopalians, Presbyterian, U.S.A., and United Methodists it approximates 32%. Other church bodies have lower rates. Even the churches of the Southern Baptist Convention, a group which has traditionally been unwilling to approve the ordination of women, find themselves with significant numbers of women fully prepared for ordination (73 women, or 8.4% of the total graduates last year).

Persons interested in additional details regarding the role of women in theological schools should consult Tables C-3, D-3, and E-3 for enrollment data and Tables F-3, G-3, and H-3 for graduation statistics.

TABLE 13
CHANGES IN BLACK STUDENT ENROLLMENT

1984	2,917	+ 1.2%	5.2%

[TABLE 13]

Black Student Enrollment

These data have been received from member schools since fall 1970, and the successive Fact Books have contained them. Table 13 provides a summary of this information. The reader will note that the numbers of blacks enrolled in seminaries has risen steadily across the years. The average rate of increase per year has been 9.7%, which is more than double the average total enrollment increase of 4.4%. However, the reader must be careful

when using these statistics. Black enrollment started from such a low point that phenomenal rates of growth have still not produced large numbers of black students. And the ratio that black students represent in the the total theological school population has only doubled within this fourteen year period, moving upward from 2.6% in 1970 and reaching 5.2% in 1983 and 1984. This is far below the black percentage of the total population, estimated by the 1980 census to be 11.7% in the United States. This reflects the fact that blacks continue to be an "underrepresented constituency" in Association schools. The increase in the number of blacks this year (1.2%) is the smallest ever recorded.

One must also keep in mind that 677, or 23.2%, of these black students are found in the five schools which have traditionally served an almost exclusively black clientele. This means that the remaining 2,272 black students are distributed across the 192 additional member seminaries. Actually this distribution is very uneven. There are 47 member institutions with no black students. Fifteen of these are in Canada, while eighteen are Roman Catholic. The largest number of blacks in a denominational grouping of schools is the 392 black students enrolled in United Methodist schools. The American Baptist group has 316 blacks, but one of these seminaries is among the five traditionally black institutions. There are 244 blacks enrolled in the six Southern Baptist theological schools, and 162 in the ten Presbyterian, U.S.A. institutions. Table D-2 indicates that there are 985 black registrants in the twenty-one inter- and nondenominational member schools, but two of these are the two largest primarily black seminaries which together enroll 435 blacks, leaving the remaining 550 black students distributed across the other nineteen institutions in this group.

[TABLE 14]

Table 14 provides a sex distribution for the 2,917 black students in the several degree categories utilized above. It is readily apparent that the general increase in women's enrollment noted earlier has also characterized the growing role of black women. In fact, their rate of increase is much greater than that for black men, since the latter are a steadily diminishing proportion of the total number of blacks in seminaries. In 1972 black men were 91.3% of the black student population. By 1984 this had dropped to 74.8%. Or to state the statistic a bit differently, in that 11 year interval black men have increased in number by 125.2%; but black women's numbers have risen by 698.9%! This growth rate is even more startling in some of the separate degree programs. For example: black women ordination candidates rose from 34 (5.0% of blacks in these programs) in 1972 to 398 (22.7%) in 1984. Black women doctoral students numbered but one person in 1972 (1.8% of black doctoral students). In 1984 there were 28 black women registered in doctoral programs, and they were 33.7% of the total. This one degree program best illustrates the increasing role for black women. In 1972 there were 55 black males in such programs; in 1984 the number remained 55. At the same time, the numbers of black women rose from 1 to 28! There have been additional increases in the other degree categories found in Table 14.

[TABLE 15]

Table 15 presents the accumulated data on black graduate degree recipients across the past decade. The fairly stable nature of the enrollment of black students in these degrees has already been noted, and the numbers of graduates across the years tend to confirm this observation. The customary fluctuations found in all graduate degree programs appear, since the normal time patterns applicable to other degrees (i.e., two years for the M.R.E., etc.) are probably not applicable. And Table 15 reveals that such is the case. Black students receiving graduate masters degrees have ranged from a low of seven (1975-76) to a high of eighteen in 1982-83. And similarly black doctoral awards have ranged from four (in two different years) to ten on three occasions. It was nine last year. From these data one must draw the conclusion that there is no discernable increase in the numbers of black graduates joining the ranks of those qualified to teach in theological schools, completing the requirements for degrees at this level. The post-M.Div. masters degrees were received by thirteen blacks (2.4% of the total), while doctoral graduates numbered only nine.

Readers interested in full details regarding black enrollment and graduation data should consult Tables C-2, D-2, E-2, F-2, G-2, and H-2 in this and earlier editions of this publication.

[TABLE 16]

Hispanic/American Enrollment

The Association of Theological Schools has been collecting this information on student enrollment since 1972, and Table 16 presents a summary of women/men distributions within the same degree categories utilized in earlier tables. The observations regarding women's and black enrollment made

1984	260	19.8%	1,054	80.2%	1,314

above are, in a general way, also applicable here. In 1972 there were only 264 Hispanic/American registrants. By 1984 this had risen to 1,314, up 398%. In that span of years total enrollments rose only 70.9%. Thus the rate of growth was more than six times greater, obviously indicating that Hispanic increase cannot be explained simply as a part of the general enrollment increase. However, before one becomes overly impressed with this phenomenon, keep in mind that these 1,314 persons are only 2.3% of seminarians, and this is far below the ratio of Hispanics in the population. We have far to go before Hispanics will cease to be "underrepresented" in theological schools. Discouraging is the fact that this is the first year we have seen a decrease in actual enrollment of Hispanics, down 67 from 1983 (-4.8%).

A careful examination of the table reveals other observations also. There was an encouraging increase in doctoral program enrollees, from 25 in 1983 to 35 in 1984, up 40%. Both the number and the percentage of ordination candidates continued to grow, despite the decrease in total enrollments. The number of special and unclassified students decreased, although the percentage of Hispanic/American students in those categories (29%) is more than double the ratio for all students (12.4%). One aspect of this reported verbally by schools but not covered in the reports is that a fair percentage of these students will register later in degree programs, once they have discovered that they are really capable of advanced-level work.

Table 16 also contains other information of interest. There is little encouraging data in the post-M.Div. graduate enrollments. Not many Hispanic seminary degree recipients pursue the kind of graduate study which prepares one for theological seminary teaching. As Hispanic enrollments continue to mount, and more schools seek Hispanic faculty, this information does not indicate the emergence of a pool of persons trained in the normal ways (i.e., the academic doctorate) to respond to invitations to teach, an unfortunate circumstance. In contrast, the rise in ordination candidates is substantial, from 44% in 1983 to 48% of Hispanic enrollment in 1984. The percentage of ordination candidates for Hispanics (48%) is approaching the ratio for the total student population (55%). Hence, the excessive registration in the special/unclassified category apparently has not adversely affected the full preparation of Hispanic students for the ordained ministry, including the earning of the normal credentials.

As was noted for black students, neither are Hispanics distributed evenly across the Association's membership. One seminary in Puerto Rico, which primarily serves Hispanics, enrolls 176, or 13.4% of the total. And 36.5% of the schools, 72, register no Hispanic students at all. This leaves 1,138 students distributed across 124 institutions.

Full details regarding Hispanic student enrollments can be found in Tables C-4, D-4, E-4, F-4, G-4, and H-4, the latter three presenting the data for graduates during the 1983-84 academic year. All of these tables are parallel to those with the same designations in earlier Fact Books, thus facilitating comparisons across a range of years.

[TABLE 17]

Pacific/Asian American Scholars

Pacific/Asian American students are defined as "persons from Asian and Pacific Island ancestry, whether born abroad, in North America, or the trust territories of the Pacific Ocean." These data have been received for the past eight years, beginning in 1977. The summaries for each year can be found in all Fact Books as Tables C-5, D-5, and E-5, with graduation information in the parallel format found in Tables F-5, G-5, and H-5. Observations above regarding other groups are also appropriate here, especially with respect to increased registrations. And this is found in all of the degree categories. The role of women is a growing one, as found elsewhere, although their ratio to men is below that found for all students. In fact, both Hispanic and black women are present in higher ratios than is the situation with Pacific/Asian women. However, it should be noted that Pacific/Asians as a group are more likely to be enrolled in graduate academic programs than any other group. There are currently 8.7% of total Pacific/Asian enrollments here, as contrasted with 7.5% in the total student population, 3.7% of Hispanics, 3.6% of blacks, and 6.4% of all women. The largest concentration of Pacific/Asian students is in the twenty inter-/nondenominational schools which together have 310 enrollees (27.4%). Next in size are the 161 persons (14.2% of the total) in the six Southern Baptist institutions. Presbyterian, U.S.A. schools of theology follow closely (126 or 11.1%), with United Methodist following (114 or 10%). Regional distributions are similarly unbalanced. Far West schools (California and Oregon) have 433 of the total, or 38.3%. Next is 184 in the Mid East region (16.3%), with Canada close behind (170 or 15%). The sharp increase of Pacific/Asians in Canadian schools is accounted for largely by a new member school. The Mid East region also had a substantial increase.

[TABLE 18]

Native American Enrollment

These are persons of Native American Indian or Eskimo origin, and the data have been received for only the last 6 years. Since the numbers are so small, they have not as yet been subjected to data processing, and the information which appears in Table 18 cannot be found among the tables included in the appendices. The table reveals that growth here has been quite slow. The current enrollment of 71 persons represents only 0.13% of the total seminary student registrants. M.Div. enrollment is now 39 persons, 12 less than in 1983. The graduate numbers are quite small, and there does not appear to be any discernable improvement. These few persons are distributed across 32 different schools, with the highest registration being 14 Native Americans in one institution, with 3 others having from 5 to 12 registrants. The only graduates this year among Native Americans (11 in number) all received the M.Div. degree.

[TABLE 19]

Changes in Numbers of Graduates

Table 19 reports the numbers of persons receiving degrees which the Association has designated as "professional." First among these is, of course, the Master of Divinity, the degree accepted by most church bodies as the appropriate preparation for ordained ministry. Since 1973-74, there has been a modest, but nevertheless, steady increase in the numbers of M.Div. graduates year by year.

TABLE 19
CHANGES IN NUMBERS OF GRADUATES:
PROFESSIONAL DEGREES

Year	M.Div/B.D.		D.Min.		1-2 Yr. Degrees		Schools Reporting

1977-78	6,362	+13.2%	908	+ 0.7%	1,897	+ 7.1%	193
1978-79	6,577	+ 3.4%	924	+ 1.8%	1,961	+ 3.4%	193
1979-80	6,875	+ 4.5%	971	+ 5.1%	2,186	+11.5%	194
1980-81	6,781	- 1.4%	1,016	+ 4.6%	2,306	+ 5.5%	193
1981-82	6,903	+ 1.8%	1,042	+ 2.6%	2,522	+ 9.4%	196
1982-83	6,686	- 3.1%	959	- 8.0%	2,627	+ 4.2%	195
1983-84	6,515	- 2.6%	1,022	+ 6.6%	2,658	+ 1.2%	195

There has been a relative plateau in M.Div. graduates since 1978 when 6,362 graduated. Since then, the highest year was 1982 with 6,903 graduates. This year it decreased to 6,515. Comparing M.Div. enrollments with M.Div. graduates over the past 3 years, we find a significant increase of 7.1% enrollment growth over 3 years. Yet graduates were down almost 4% over the same 3 years. Apart from the possibility of a higher percentage of noncompletions, the schools themselves report that a steadily growing percentage of students, both part-time and full-time, are taking more than the basic 3 years to complete the M.Div.

We can observe a similar phenomenon in reports for the D.Min. program. This year's (1984) growth in graduates of 6.6% reversed last year's 8% decline. Overall, the period 1981-84 reflects a stable number of D.Min. graduates. At the same time, there has been a slow but steady growth in D.Min. enrollments of 13.7% from 1981 to 1984. The slowing down of the dramatic growth in enrollment up to 1979 is reflected in the more stable numbers of graduates over the past 3 years. When we add the complicating factor of D.Min. "projects" which can be completed in a varying number of years in a given program depending on the motivation of the candidate and the constraints of full-time ministerial engagement, we can understand why a relatively stable pattern of graduates will still involve fluctuating graduation data. The D.Min. appears to have found a rather stable place in the offerings of our member schools.

The results for the one- and two-year degree are in contrast with the above observations. With but one exception (1972-73) there has been a steady increase in numbers of graduates from these programs. In most years this has been less than ten percent, but the rate has been upward. This year the increase was 4.2%, reflecting the rising enrollment pace reported in Table 5. In addition, we note that the three-year (1981-84) enrollment increase of 16.7% is paralleled by a three-year (1981-84) growth in graduates of 15.3%.

[TABLE 20]

Table 20 provides parallel information for the graduation data among the several doctoral degrees. The doctorate in religious education is a rather small enterprise, limited to only a few schools. And the graduation data illustrate this restricted existence. The largest graduating group was 28 persons (1979-80), with 22 last year. The range has been from a low of 6 to a high of 28. Th.D./S.T.D. data can be misleading, since this is merely another name for the Ph.D. in some institutions. (The former days when the Ph.D. was awarded only by universities and the Th.D./S.T.D. only by free-standing seminaries no longer prevail. And some free-standing schools during the period reported in Table 20 have simply changed the name of the existing degree, making for further confusion in using these data.) Nonetheless, even with the limited Th.D./S.T.D. enrollments, reported above in Table 7, last year the Th.D. graduates again were 48 persons. It seems obvious that this statistic is doomed to fluctuation. For the last 6 years graduates have numbered 87, 40, 79, 32, 48, and 48. The enrollments in the years 1978 to 1983 ranged only from 437 to 478. This year's 1984 enrollment of 523 represents a significant increase of 15.2%.

TABLE 20

1979-80	28	+ 33.3%	40	-54.0%	189	- 7.4%
1980-81	13	- 53.6%	79	+97.5%	230	+21.7%
1981-82	27	+107.7%	32	-9.5%	363	+57.8%
1982-83	24	- 11.1%	48	50.0%	259	-28.7%
1983-84	22	- 8.3%	48	0	236	- 8.9%

Graduates with the Ph.D. are also reported in Table 20. The same type of fluctuation prevails there also. Ph.D. recipients in the last eight years have been, successively, 171, 224, 204, 189, 230, 363, 259, and 236. The large number (363) in 1981-82 was 40.2% higher than the next highest year, making this a most unexpected phenomenon. It may be that this was simply a one-year experience which does not readily lend itself to explanation, and it probably should not be utilized in any efforts to discern trends in Ph.D. production. Since enrollments in the Ph.D. have risen substantially in the last three years (up 27.6% over fall 1981), it can reasonably be expected that larger numbers of graduates will be forthcoming.

[TABLE 21]

Changes in School Size and Comparative Enrollments

As indicated at the outset of this chapter in Table 1, there has been a steady and substantial increase in the number of students enrolled across the years, accompanied by a much smaller increase in the number of member schools. Average enrollment has risen from 175.38 per school in 1969 to 286.63 in 1984. Table 21 reports those changes in terms of the five size distributions utilized by the Fact Book, and reports the changing percentages of schools in each size group and the percentage of students enrolled in each group. As one might expect, the most startling data are in the smallest and largest size categories. In 1969 there were 25 schools (14.7%) with fifty or fewer students, and 2.5% of all students were enrolled in these twenty-five institutions. Despite a 15.9% increase in the

number of schools, by 1984 there were only 12 institutions with 50 or less students (down to 6.1% of total institutions), enrolling only 0.7% of total students. Thus, while smaller schools continue to exist, their numbers continually decrease and they serve a rapidly diminishing percentage of the total student population.

TABLE 21
CHANGES IN SCHOOL SIZE AND COMPARATIVE ENROLLMENTS

% Enrollment	0.7%	15.0%	19.3%	22.3%	42.7%	56,466

At the opposite end of the size scale precisely reversed results are evident. In 1969 only eleven institutions registered over 500 persons. This rose to 21 in 1984. And the ratio of total institutions which these 21 comprise almost rose from 6.5% to 10.7%). Similar dramatic changes are apparent in the students served. Those 11 seminaries in 1969 were enrolling about one-fourth (26.2%) of all students. The 21 in 1984 register two-fifths (42.7%) of the students. And, as will be discussed later in this volume, they provide education for 42.7% of the students while spending only 34.4% of the total theological school expenditures.

The reader will find similar data for the three middle size categories by studying Table 21. This table was prepared from information contained in Tables C or C-1 for the Fact Books in each of the years cited.

NUMBER AND DISTRIBUTION OF PERSONNEL

[TABLE 22]

Tables O through V in this and earlier Fact Books provide the detailed information about theological schools' professional employees. Since the tables have maintained their precisely parallel nature across the years, it is possible to make very accurate comparisons from year to year. The customary distributions by size and status, denomination, and region are included.

Table 22 is a summary of this information regarding administrators, faculty, and librarians for selected years since fall 1970. The table reports the total numbers of persons in each category, the average number per school (to eliminate the effect of constantly changing numbers of member schools), and the percentage of change from the previous year. For purposes of comparison the same data are provided for student enrollments, permitting ready analysis of total personnel trends (professional employees and students).

When the percentage of change for total professional personnel is compared with the rise in enrollment, it is apparent that student bodies are increasing much more rapidly than are the staff to serve their educational needs. In no year does the percentage of change for personnel match the percentage of student growth. The largest rise in personnel per school is found in the administrators' category. Between 1970 and 1984 the average number of professional administrative personnel per school rose by 31.3%, while the increase of faculty was 6.5%, and librarians only 5.5%. However, one should not be misled by these percentages. The almost one-third growth in administrators involved only slightly more than one person per school, from an average of 4.19 administrators to 5.5 per school. These numbers are obviously not excessive in any sense. While the student body was increasing by 65.1% in these fourteen years, full-time faculty rose only 6.5%. This fact must be tempered by the following table's data. At the same time that full-time faculty were increasing so very modestly (with a 2% decrease in 1984), part-time instructional personnel were becoming far more numerous. The other significant change this year was an increase of 4.6% in the numbers of librarians, bringing them to an average of 2.29 professionals for each library.

TABLE 23

COMPARISONS OF FULL-TIME AND PART-TIME INSTRUCTIONAL
PERSONNEL AS PERCENTAGE OF TOTAL TEACHING STAFF

Year	Number Full-Time	Number Part-Time	Full-Time Equiv.	Total, includ. Full-time Equiv.	% of Full-time Equiv. Supplied by Part-time Persons
1971-72	2,297	1,498	429	2,726	15.7%
1972-73	2,308	1,661	470	2,778	16.9%
1973-74	2,255	1,991	522	2,777	18.8%
1974-75	2,237	1,777	525	2,762	19.0%
1975-76	2,349	2,023	581	2,930	19.8%
1976-77	2,386	2,135	597	2,983	20.0%
1977-78	2,383	2,168	611	2,994	20.4%
1978-79	2,397	2,053	589	2,986	19.7%
1979-80	2,440	2,099	594	3,034	19.6%
1980-81	2,471	2,374	656	3,127	21.0%
1981-82	2,473	2,467	693	3,166	21.9%
1982-83	2,519	2,693	757	3,276	23.1%
1983-84	2,542	2,944	840	3,382	24.8%
1984-85	2,518	3,111	857	3,375	25.4%

[TABLE 23]

As noted above, Table 23 extends this analysis by examining the role of part-time instructional personnel in seminary teaching. In the period between 1971 and 1984 full-time faculty have increased in total numbers of persons employed from 2,297 to 2,518 (up 9.6%). In that same interval the part-time persons offering instruction have risen from 1,498 to 3,111 (up 99.8%). And translated into full-time equivalency, these persons moved from 429 FTE to 840 FTE (up 95.8%). Furthermore, the proportion of total instruction offered by part-time instructors moved from 15.7% of the total to 25.4% this year. All of this means that today about one out of every four classes offered by a theological school is being taught by a person whose relationship to the instructional work of that institution is part time. When compared with the rest of higher education, this is not particularly surprising. However, given the historic reliance of seminaries on full-time staff for all or virtually all of their teaching, it is obviously a new phenomenon. When one considers the move toward extension, off-campus instruction which is characteristic of many seminaries, this trend toward additional part-time staff is probably inevitable. Table 23 provides the changing picture of this situation across the years.

TABLE 24

SEX DISTRIBUTION OF ADMINISTRATIVE PERSONNEL

	Men		Women		Total Number
	Number	%	Number	%	
1971	743	87.8%	103	12.2%	846

1983	816	76.1%	256	23.9%	1,072
1984	827	76.3%	257	23.7%	1,084

[TABLE 24]

Distribution of Personnel by Sex

Tables 0 through V also provide these data for administrative, faculty, and library personnel distributed across both sex and race categories. Tables 24, 25, and 26 summarize this information and report it from the several successive Fact Books published annually. This year's data

appear to correct partially the sharp drop reported last year in the number of male administrators. The sharp drop reported in 1983 was probably attributable to a clarification that year in the instructions for completing the annual report forms, viz., that persons with divided administrative and teaching roles are to be listed as administrators only if more than one-half of their time is devoted thereto. Conversely, if they teach more than one-half time, the proper location for the listing is in faculty data. The increase, however, of 12 in this year's report (1984) of the total number of administrators reflects the very normal increase with two additional schools.

[TABLE 25]

Table 25 provides parallel information regarding faculty, and these distributions have been received from member schools since 1971. In that year there were only 73 women teaching full time in theological seminaries. Thirteen years later, by 1984, this had risen to 283 women, and the ratio of women to men had grown from but 3.2% to 11.2%. The rate of increase has actually accelerated a bit in the last four years. Similar data are found at the bottom of the table for the adjunct or part-time teaching staff who are women. Here the ratio has always been somewhat higher than among the full-time instructors, moving from 6.9% in 1971 to 18.0% this current year, a not quite three-fold increase. The Table 25 data illustrate the fact that the more rapid rate of increase among women employed full time does not prevail with the adjunct group. Here the relative percentage of men (82%) and of women (18%) remained almost constant for the past three years.

TABLE 25
SEX DISTRIBUTION OF FACULTY PERSONNEL
FULL-TIME

	Men		Women		Total Number
	Number	%	Number	%	
1971	2,224	96.8%	73	3.2%	2,297

1983	2,415	82.0%	529	18.0%	2,944
1984	2,551	82.0%	560	18.0%	3,111

[TABLE 26]

Table 26 examines this information for a shorter period of time but with more precision, since it shows changes for each professional position. Though there was very little change in the total number of women in administrative roles, the distribution is different. There was a significant increase in the top three categories (Chief Administrator, Ass't. Admn., Academic Dean) where the number rose 28%, from 14 to 18 women.

Women faculty also continue to increase in numbers as Table 26 indicates. There has been a steady growth in actual numbers for the past three years with a 5.6% increase in 1984. The traditionally tenured positions of full and associate professor saw an above average increase in 1984 of 11%. These two ranks were held by 142 women, up from 128 last year and 116 in 1982.

While from one viewpoint these increases are commendable, it is quite obvious that women still are significantly underrepresented on seminary faculties. The numbers of women teaching in an adjunct role have already been discussed above, and further comment seems unnecessary.

The situation with respect to women employed as professional library staff is somewhat different. This year there was an increase of 19 women among full-time library employees or 6.7% more than in 1983. Overall,

women account for 54.8% of library staff, a percentage which has varied little over the past five years. The specific positions and the data in successive years for each are reported for the past four years in Table 26.

[TABLE 27]

Professional Employment Data for Blacks

Table 27 parallels the preceding one in format, but it provides information regarding the employment of blacks among administration, faculty, and library categories. An initial overall glance at the table will indicate that there has been only a slight variation with the percentage of blacks employed as administrative staff and as faculty. Both the number, however, and the percentage of blacks employed as library staff did decline from 16 to 12 persons with a percentage of total library staff of only 2.2%, down from 3.1% in 1983.

TABLE 27

Totals	12	2.3%	14	2.8%	16	3.1%	12	2.2%

There is one further qualification to these data which must be acknowledged. Twelve of the black administrators serve in the 5 primarily black institutions, leaving but 27 for the other 192 schools. Thirty-six of the 104 full-time black faculty teach in these 5 seminaries, with but 68 distributed across the primarily white theological schools. Thirty-three of the 120 black adjunct faculty are in these 5 institutions, as are 8 of the 12 librarians. Hence, the data clearly indicate that there is still very little "black presence" in schools of theology.

COMPENSATION

Table NN-VV in the appendices provide full details regarding total compensation for professional staff employed in non-Roman Catholic institutions. Staff in Roman Catholic schools have been eliminated from these averages because of the "contributed services" aspect of compensation and the variety of ways this is treated in the Canadian and United States Catholic member schools. Please note that the amounts listed are total compensation, not just cash salary paid. Total compensation includes cash salary, housing allowance (if any) or rental value of housing provided, institutional payments for fringe benefits (insurance, etc.), and the institutional contribution to pensions. Compensation for administrative staff is for a twelve-month period, while faculty compensation is for nine months (the regular academic year). Extra compensation, such as summer school salaries, is not included in these quotations.

Readers interested in the full details should study the appendices of this and earlier Fact Books with care. It will be evident from such an analysis that there is considerable variety in patterns of compensation. Two total compensation amounts which are very similar may, in fact, have considerable variation in the components. Some institutions choose to pay larger cash salaries and provide little in fringe benefits or only very modest pension support. Other schools, providing much the same total compensation, may have a considerably lower cash salary but offer extensive benefits in insurance, family medical coverage, educational allowances for children, and substantial contributions to pension plans. Therefore, the reader must be very careful when comparing "salaries" to be certain that the entire package of cash and the value of other benefits has been included in the evaluation.

Inflation has been a major factor for the past several years in its impact on compensation patterns. Hence, one must take it into account when evaluating the progress of remuneration. While total compensation has been steadily rising, year after year, the rate of growth has often failed to match the increase in the cost of living index. And professional staff in schools of theology have fallen further behind each year in maintaining pace with the cost of living rise. After a number of years in which inflation hovered at the "double digit" level (+10.7%, +13.2%, +11.3% for six, five, and four years ago, respectively), it has dropped sharply in the last three years (+6.5%, +2.4%, and +4.1%). Hence, while compensation growth during the double-digit years always fell substantially below the index, the last three years there has been some recovery from these losses. All of the tables included in the text have been designed to show the impact of inflation on the rising salaries. In contrast, the tables found in the appendices do not reflect adjustments for inflation, and they should be used with care.

[TABLE 28]

Administrative Compensation

Table 28 summarizes the data for each administrative position for the past 5 years. This information is taken from Table NN in the appendices of this and earlier editions. Tables OO and PP provide this same information distributed by denomination and by region/highest degree offered categories. Among the accredited schools, all of the nine positions received compensation increases in excess of the cost of living growth. Overall

accredited administrative staff increases almost doubled the inflation index. When added to last year's gain, there has been a cumulative +8.57% recovery from the losses encountered in the earlier years. Table 28 also includes data for administrative personnel in candidate and associate member institutions, designated collectively as "other." Here four of the positions received real losses, while all of the others exhibit increases in excess of the +4.1% inflationary factor. As a group these administrative personnel received somewhat lower increases in compensation than that experienced by the accredited schools (+2.4% and +7.7%, respectively). Thus both groups of schools reflect the continued efforts of theological schools to overcome earlier losses to inflation.

[TABLES 29 - 34]

Faculty Compensation

The same detailed information regarding faculty total compensation is provided in Tables 29-34. Total compensation includes cash salary, housing allowance, value of fringe benefits, and school contribution to pension. 1982-83 was the first time since 1976-77 that faculty compensation had matched the rise in the cost of living, and that achievement was repeated again in 1983-84 for faculty in both accredited and other institutions. In 1984-85, however, faculty in accredited schools received compensation beyond the rise in the cost of living. Not so for the faculty of the other institutions who suffered a loss of -2.4%. The importance of this general improvement should not be overestimated, since it follows five consecutive years of loss to the cost of living. In fact, during the past twelve years, there have been eight years of net losses to inflation (a total of -19.6%). As will be evident in subsequent tables below, theological school compensation will have to grow at a rate substantially in excess of inflation for several more years to regain a position comparable to the base year (1969) when these data were first received and published. The tables in the text have been designed to illustrate the impact of inflation quite clearly. Tables 29 and 32 report the dollar amounts of compensation for seven successive years. Tables 30 and 33 translate these sums into percentages of dollar change. Tables 31 and 34 apply the effect of inflation to these percentages, providing the net real change in compensation after inflation. The first three tables (Tables 29-31) are for the accredited schools, the latter three tables (Tables 32-34) for candidate and associate institutions. Full details are in the appendices, including faculty compensation data distributed by denomination (Table RR), region, and highest degree offered (Table SS).

[TABLE 35]

Library Staff Compensation

Table 35 summarizes the data for library staff compensation across the past 4 years. Full details are available in Tables TT, UU, and VV in the appendices. Accredited school library staff are receiving an additional

+6.2% in compensation during 1984-85, indicating that they have enjoyed salary increases in excess of inflation for the past two years. Library staff in other candidate and associate schools more than made up for their net loss of the past two years with an increase of +16.0%. When averaged out over a five-year span, librarians compensation in both categories of schools shows a steady increase despite a few fluctuations for which we have no obvious explanation.

[TABLE 36]

Summary

The preceding tables provide compensation amounts and comparisons only across a few recent years. The Association of Theological Schools began to receive and publish these data in the 1969-70 academic year, a time when the excessive inflationary experiences of the 1970s had not yet begun. Hence a summary table reporting the situation with respect to compensation comparisons across those fifteen years may give the reader a better perspective on the economic condition of professional staff today, as contrasted with the base line year. Table 36 provides this information in summary fashion for administrative, faculty, and library staff in both accredited and other school categories. In that period the consumer price index has risen by +182.5% a tremendous rate of growth. No single group of professional employees in theological schools has matched that increase. Librarians in accredited schools came closest (+172.7%) with faculty in accredited institutions not far behind. At the other end of the scale, candidate and associate school librarians received the least additional compensation (+151.7%) but have risen substantially in the past year. Accredited school administrators are receiving the largest dollar amounts of compensation.

TABLE 36

FIFTEEN-YEAR COMPARISONS IN COMPENSATION PATTERNS
(Excludes Roman Catholic Schools)

	1969-70	1984-85	% Change
<u>All Administrative Avg.</u>			
Accredited Schools	\$15,966	\$42,349	+165.2%
Other Schools	12,314	32,613	+164.8%
<u>All Faculty Avg.</u>			
Accredited Schools	\$14,248	\$38,445	+169.8%
Other Schools	11,692	30,767	+163.1%
<u>All Library Avg.</u>			
Accredited Schools	\$ 9,689	\$26,422	+172.7%
Other Schools	7,926	19,903	+151.1%
Consumer Price Index Change: July 1969 to July 1984			+182.5%

[TABLE 37]

Table 37 supplements this information, by confining the data to the last six years. In this period the cumulative inflationary rate has been +58.4%, and the gains of the past two years bring professional staff in schools of theology close to matching this growth. The poorest record during the five years was recorded for other school administrative staff.

TABLE 37

SIX-YEAR COMPARISON IN COMPENSATION PATTERNS
(Excludes Roman Catholic Schools)

	1978-79	1984-85	% Change
<u>All Administrative Avg.</u>			
Accredited Schools	\$26,352	\$42,349	+ 60.7%
Other Schools	22,408	32,613	+ 45.5%
<u>All Faculty Avg.</u>			
Accredited Schools	\$24,410	\$38,445	+ 57.5%
Other Schools	19,302	30,767	+ 59.4%
<u>All Library Avg.</u>			
Accredited Schools	\$16,828	\$26,422	+ 57.0%
Other Schools	11,490	19,903	+ 73.2%
Consumer Price Index Change: July 1978 to July 1984			+ 58.4%

One must inevitably conclude from this table that the losses sustained in the first three of the last six years have almost been recovered, but the earlier losses (prior to 1978-79) have not been totally addressed by the improvements in compensation experienced recently. Additional compensation growth in excess of inflation will be necessary to bring salaries back to their 1969-70 relationship with the consumer price index.

FINANCES -- REVENUES AND EXPENDITURES

Tables AA-JJ provide the overall financial information for the ATS schools of theology for the academic year 1982-83. The reader can find these in the appendices. There are two sets of tables supplied. Each table includes the appropriate dollar amounts, the ratio of educational and general revenue/expenditure which that represents (stated as a percentage), and the calculated per student sum. As noted, the tables with the suffix -1 provide the student data on a "head count" basis. Those with a -2 suffix utilize the "full-time equivalency" (FTE) enrollment. In some groupings, especially where there are large numbers of part-time students, the per student costs will differ quite markedly. This information is provided this year for the fourth successive year, and tables in this and the preceding three Fact Books are parallel and may be used directly to arrive at comparisons, subject to the exception noted below.

The 1983-84 Fact Book explained at length (pp. 52-55) the salutary effects of a change in the instructions for the Annual Report Forms which has served to limit the instances of "double-counting" of student aid income. The reader is referred to those pages for a full explanation. The old procedure inflated the total revenue and yielded paper surpluses which did not exist in reality. The good effects of the change in procedure have been verified again in the 1984-85 data.

[TABLE 38]

Table 38 summarizes the total financial data reported again this year under the newer instructions. Please observe the footnote to the table. The change in reporting methodology no longer permits any claim of precise comparability with previous years. With the newer methodology, 1983-84 data is comparable to 1982-83 data, but these two years are no longer precisely comparable to previous years. The newer data, however, are more accurate than the data of earlier years. Table 38 reveals an increase of total revenue for 1983-84 of 8%, together with an even greater rise in expenditures of 8.5%. With the more rapid increase of expenditures over revenues, the surplus has also decreased to \$4.86 million. The exceptionally small 1982-83 revenue increase (2.1%) probably reflects the correction for student aid income which had often been double counted as revenue in previous years.

The reader should not be misled by this multimillion dollar surplus. While at first glance it appears to be substantial, in fact it is just \$24,685 per member school; only \$123 per full-time equivalent student; even less \$86 per head count student. Stated in this manner, these are not particularly impressive surpluses, especially when compared with the fact that it cost \$9,636 to provide education for each full-time student during 1983-84 in accredited member schools. The 1982-83 Fact Book noted that for the

first time the auxiliary enterprise category appeared to indicate a surplus. This would include the charges levied for food, housing, bookstore, etc., as compared with the expenditures incurred in providing those services. In every previous year a deficit had prevailed. Last year, perhaps enhanced by the impact of the revenue netting procedure, there was a more than \$3 million reported deficit. This year the deficit is smaller, \$2.1 million, or \$53 per FTE student. If deficits in these services are going to be regularly prevalent, it seems obvious that management attention to this situation is needed.

TABLE 38
TRENDS IN TOTAL FINANCIAL DATA
(Includes All Schools)

Year	Total Revenues	Total Expenditures	Surplus/Deficit
1968-69	\$ 95,585,000	\$ 97,345,000	\$-1,760,000

% Change	+12.2%	+ 9.2%	+ 2.0%	+ 4.4%	+ 5.0%	+ 2.8%

the bottom of the revenue and expenditure categories. Two years ago (using the older manner of reporting) the revenue gain was +13.2%; last year it was but +0.9% per full-time student. The expenditure data are +12.2% and +2.0% respectively. When one compares the revenue enhancement of but 0.9% while expenditures rose 2.0%, the decrease in the surplus noted above is again apparent. Note also the student aid rows for both. Student aid as a revenue category has been eliminated totally. The \$647 per student in student aid within accredited schools during 1981-82 became zero in 1982-83 and 1983-84. This does not mean that contributions designated for student aid disappeared last year. They continued as in the past. However, they

are now reported in terms of source: endowment proceeds, gifts, or grants. This makes student aid income parallel to all other income, designated and otherwise. The student aid expenditure line reveals the extent by which some member institutions were unable to comply with the new reporting. \$242 per student (in accredited schools) and \$89 per student (in the other schools) could not be subjected to the netting process used by most institutions.

The reader will also want to examine the revenue/expenditure totals for the "other category" of institutions. In the first two years the overall surplus situation noted above was found there, as well as in the accredited group. In 1980-81 it was \$129 per student; in 1981-82 down to \$44 per student; but with surpluses both years. For 1982-83 the surplus has disappeared entirely, and a \$71 deficit prevails. In 1983-84 there is again a small surplus of \$58 per FTE student. Thus the total surplus of slightly more than \$4.8 million noted earlier is not the product of the unaccredited institutions. Among the accredited schools the comparable sums are surpluses of \$172 in 1980-81; \$279 in 1981-82; \$181 in 1982-83; and \$141 in 1983-84.

Further evidence of the impact of these reporting changes is evident when one compares Tables AA-1 in each of the last two years. Consistently across the years tuition revenue in accredited institutions has been between 27% and 29%. Last year (1982-83), the percentage dropped to 22%, and rose only to 23% for 1983-84, indicating that some 5% to 7% of previously reported tuition was being included as revenue for a second time. The new procedure initiated last year eliminates this. Furthermore, the endowment ratio moved up from 22% to 24% in 1982-83 and held at 24 % for 1983-84. Correspondingly, the gifts/grants category increased from 40% to 45% in 1982-83 and moved down to 43% in 1983-84. The double reporting phenomenon appears to have been largely confined to accredited institutions, since the other category of schools experienced no change in the tuition source of revenue. In contrast these newer reporting instructions appear to have no impact on the expenditure ratios, since these remained much the same during the past three years.

One final observation and explanation from last year's Fact Book bears repeating. "The discerning reader will detect a substantial increase in educational and general revenue in the 1983-84 Fact Book when compared with earlier editions. One must not be misled by this increase, since it is more apparent than real. Previously the Association segregated student aid outside the educational and general category, both on the revenue and expenditure side. This has been eliminated, but only as an item of revenue. Hence revenue designated as student aid now appears within educational and general. It continues to be excluded from that category of expenditure, an arbitrary decision of the Association related to its procedures for assessing dues. Hence, if one wants to understand the full financial picture of a seminary, total revenues must be compared with total expenditures. One can no longer draw conclusions regarding fiscal health merely by examining educational and general revenue and expenditures."

Full details on all of these matters are available in the appendices, Tables AA-1 through JJ-2. As noted they must be read with care when compared with the same tables in previous Fact Books.

Gifts and Grants Income

In the 1983 Annual Report Forms, the D-1 Form was included for the first time. It requested a detailed breakdown of sources of gift and grant income. The experience of 1983 permitted us to refine the questionnaire and to include this year for the first time in the Fact Book a series of tables on the major sources of income by size of school and by denomination. Form D-1 will be a regular part of the Annual Report. We shall use the fall 1984 data as a base for noting trends in support. The reader may wish to note the number of schools reporting income in each category by comparison with total membership in the Association. Of interest will likewise be the average gift and the range of gifts. The trend of giving by corporations, by local churches, governing boards, and the designated purpose of the gifts should provide interesting information for presidents and development officers. Tables WW-1 through 7 provide detailed information on sources of gift income.

FOOTNOTES

- ¹ Data for this school are the combined totals for the Covina and Berkeley campuses prior to 1975.
- ² This institution appears in editions prior to 1983-84 as Mt. St. Mary's Seminary of the West.
- ³ Data prior to 1972 are those of Pine Hill, one of the institutions merging to form the Atlantic School of Theology.
- ⁴ Pre-1970 data are combined totals of prior institutions.
- ⁵ Pre-1974 data are combined totals of prior institutions.
- ⁶ Fuller's total enrollment includes students in the School of Psychology which ATS does not accredit.
- ⁷ Pre-1974 data are the combined totals of the two prior institutions.

- ⁸ The 1968 enrollment figure is the combined totals for the two prior institutions.
- ⁹ Pre-1982 data are the combined totals of prior institutions.
- ¹⁰ Pre-1968 data are combined totals of prior institutions.
- ¹¹ 1984 enrollment figures include students transferred to St. Thomas with the closing of DeAndreis.
- ¹² The Toronto School of Theology is the coordinating agency for seven theological schools. All student registrations appear in the data supplied by those individual institutions.
- ¹³ Pre-1978 data are combined totals of prior institutions.
- ¹⁴ In 1983 the University of the South also enrolled several hundred nondegree extension students who are not included in the Fact Book data.
- ¹⁵ Data prior to 1971 are the combined totals of the two schools which united to form Vancouver.
- ¹⁶ Enrollment data are the combined totals of Yale and Berkeley prior to 1971.

FOOTNOTE

- ¹ This institution received Candidate status January 1985. In this edition of the Fact Book, its data from fall 1984 reports are included with the Associate status group.

TABLE B-2

Enrollment by Individual Degree Programs

Note: Person count and full time equivalent enrollment by separate degree programs are reported in the following tables for Fall 1983 and Fall 1984 years. FTE appears in parentheses. Nomenclature for the two-year degrees varies considerably. Hence some common abbreviations have been used, regardless of actual degree title: M.R.E. for religious education: MAR/MTS/MA for others.
